PD618SA Active Subwoofer 18"

The PD6 series is a series of high-quality professional speaker cabinets in a strong and durable plywood housing. Finished with a black painted rubber coating to protect the cabinet during transport. The PD6 series are ideal for rental and touring use and deliver enough output for large venues and events. They are an extremely cost-effective solution for professional applications. This 18" powered subwoofer has a music power of 700W and produces a sound pressure of 130dB. The internal crossover ensures that the highs are offered to the satellite speaker. The subwoofer is equipped with a loop through output to connect a second subwoofer or amplifier as well as a high pass output for direct connection of satellite speakers. The high pass output has a built-in crossover which is adjustable between 50 and 150Hz.

Peak power	1400W
Power max.	700W
Power rms	Class-D 500W
Impedance	8 Ohm
Frequency response	50-300Hz
Sensitivity	101dB
SPL max	130dB
Dimensions	600 x 510 x 610mm
Weight	30.9kg

- 700W Active subwoofer 18"
- Efficient class-D amplifier
- Plywood housing with strong rubber coating
- XLR Balanced line input
- Loop through for connection to second amplifier
- High Pass output for connection to active satellite speakers
- Phase control (0 - 180°)
- Crossover 50-150Hz adjustable
