

Power Dynamics PD612A Active Speaker 12"

Power Dynamics 178.972

The PD6 series is a series of high-quality professional speaker cabinets in a strong and durable plywood housing. Finished with a black painted rubber coating to protect the cabinet during transport. The PD6 series are ideal for rental and touring use and deliver enough output for large venues and events. They are an extremely cost-effective solution for professional applications.

This active 12" PA speaker has a music power of 400W, generating an acoustic pressure level of 124dB. The PD612A features a selectable 4 preset modes for Flat, DJ, Contour and Voice sound settings. The built-in limiter provides security against clipping and distortion of your music.
